

JETSURF

GEMOTORISEERD SURFEN IS EEN GLOEDNIEUWE WERELDWIJDE
MOTORSPORTDISCIPLINE.

JETSURF BELGIË ZORGT ERVOOR DAT ALLE MOTORSPORTFANATEN EN
WATERSPORTLIEFHEBBERS VAN DEZE SPORT HOUDEN.

ADVENTURE DFI **GEMOTORISEERD SURFBOARD**

€ 12692.90

De Adventure DFI combineert alle kenmerken van een stabiele romp, de nieuwste DFI-technologie motor en het FCS-vinnen klikaan/ klik-systeem voor een gereedschapsloze gebruikers benadering. Het board is gemaakt voor langere tochten op alle water, zelfs inclusief golven. Gebruikersniveau: Gevorderde

Dimensions

| | |
|---------------|------------------------|
| Length | 1800 mm / 70.87 inches |
| Width | 600 mm / 23.62 inches |
| Height | 150 mm / 5.91 inches |
| Weight | 18.5 kg / 40.8 pounds |
| Max load | 120 kg / 264 pounds |
| Fuel capacity | 2.8 l / 0.74 gallons |
| Bindings | Dual foot bindings |

Drive unit

| | |
|-------------------|--|
| Propulsion system | Jet-Pump direct drive |
| Racing pump | Carbon fiber; Axial flow; single stage |
| Racing impeller | Carbon fiber |

Engine

| | |
|--------------|--|
| Type | 2 stroke engine NG 100 DFI |
| Displacement | 100 CC |
| Fuel | Unleaded 95 + full synthetic 2 stroke racing oil |
| Top speed | 55 km/h / 35 mph |

Electrical

| | |
|--------------------|--|
| Ignition Processor | ICU |
| Starter | 3F brushless starter |
| Battery | Li-Ion 9 Ah (99Wh) - The engine does not recharge the battery starts or 3 hours of continuous riding without recharging. Rec cigarette lighter output or socket. |

FCS FINS

Installation of the fins has never been easier! The click on/click off FCS patented system comes to JetSurf in the 2021 line-for the fast Fitting of fins and screw elimination..

Dual foot bindings

New ergonomic pads and straps will make your ride on JetSurf even more comfortable for your feet. Dual bindings fit for both regular and goofy riders.

2 STROKE 100 CC ENGINE DFİ

Since 2010, MSR ENGINES company has been developing the most advanced motorized surfboard in the world. Tested in the toughest conditions such as big waves, various water surfaces and high performance racing series in MotoSurf WorldCup, JETSURF Motorized Surfboard® is coming with the latest digital fuel injection motor that brings motosurfing world to a whole new perspective.

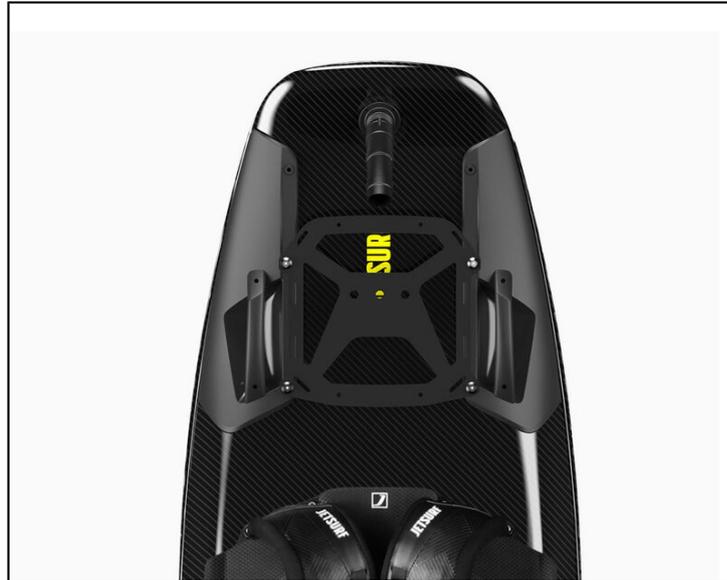

GRAPHIC DESIGNS

JetSurf follows modern trends to deliver the most fashionable & cool looks for every single unit.

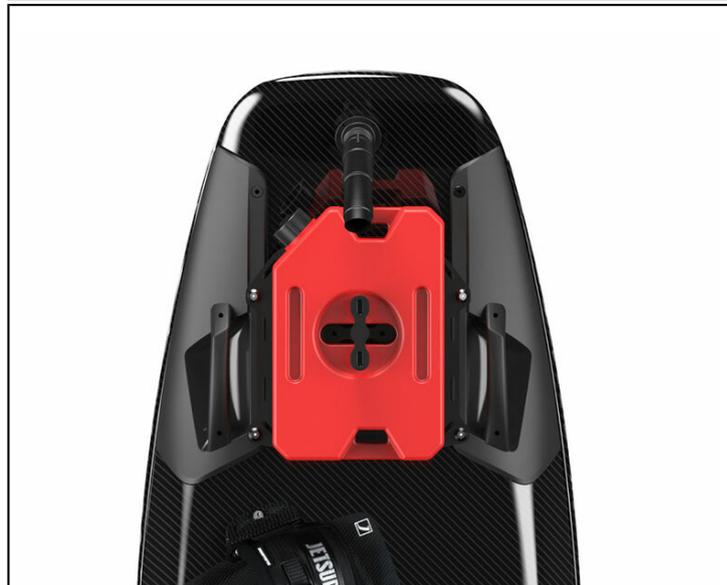

RACK

JETSURF Adventure is a right choice for any experience. Why not to film it or make a photo memory from your ride? Carrying your belongings has never been easier on a JETSURF board. The Rack on the Adventure model will now help you to put a duffel or additional fuel can on board. The RACK is optional equipment available at additional cost.

FUEL TANK

Fuel tank is a brand new accessory attachable with a clip to the front part of the JETSURF ADVENTURE board. Additional fuel tank will make the board independent for up to 3 hours of cruising time. The FUEL TANK is optional equipment available at additional cost.

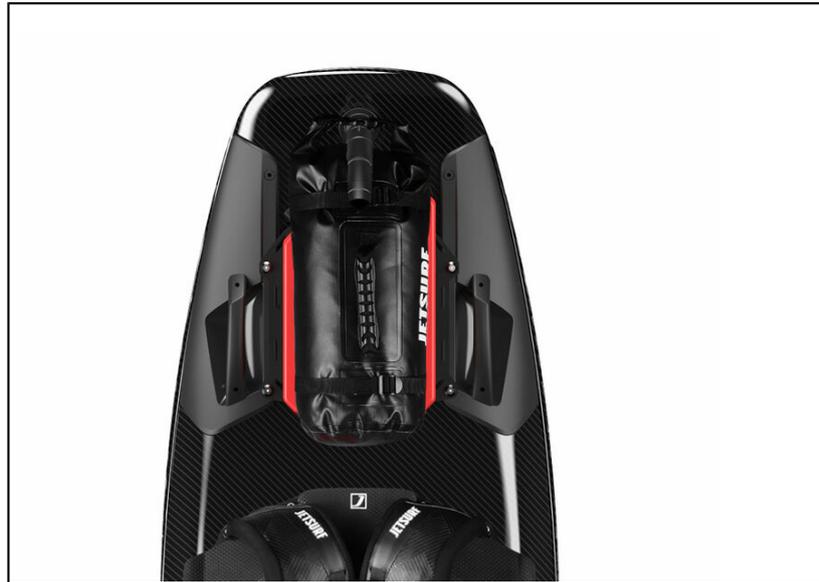

SILENCER

Silencer is a brand new feature coming to the JETSURF model line-up. The silencer significantly reduces the noise to 59 dB and makes the JETSURF boards Directive 2013/53/EU of the European Parliament and of the Council compliant.

DUFFEL

Designed for long distance cruises, the rack allows riders to fix a duffel on the rack to carry extra equipment to make your journey even more enjoyable experience. Whether like to take a toolbag, selfie stick, cameras to record your riding skills, all will fit to your JETSURF ADVENTURE model additional duffel. Volume is 15 litres. The DUFFEL is optional equipment available at additional cost.

UNDER CONTROL

Acceleration, speed, balance, - it's all in your hand. The JETSURF control handle serves for starting the board, throttle acceleration and makes a good stability point at any stage of your riding level.

BUMPERS

Board protected by ergonomic front bumpers

SHUT-OFF KEY (2PCS)

This key shuts down the engine immediately after losing connection with the throttle controller. Packaging contains two pieces.

INTAKE SCREEN

Say NO to troubles with dirt in your JETPUMP. Intake screen protected

ADVENTURE DFI PLUS GEMOTORISEERD SURFBOARD

€ 14507.90

De gloednieuwe Adventure DFI Plus vertegenwoordigt een revolutie in gemotoriseerd surfen. Geïntegreerde dynamo maakt het board onafhankelijk van opladen en de extra brandstof tank vergroot het bereik tot 100 km. U hoeft geen gereedschap meer te gebruiken, de bediening van dit gemotoriseerde bord is zonder gereedschap. De volledige installatie van de FCS click on:click off systeemsloten vereenvoudigt het hele proces onderhoud en bediening. Gebruikersniveau: Gevorderde

Dimensions

| | |
|---------------|--|
| Length | 1800 mm / 70.87 inches |
| Width | 600 mm / 23.62 inches |

| Charging | Water cooled alternator |
| Starter | 3F brushless starter |
| Battery | Li-Ion 9 Ah (99Wh) - The engine recharge the battery |

ALTERNATOR

The JetSurf Motorized Surfboard works hard to push the industry beyond its limits. The level of fun factor is directly proportional to the limits you face when using the craft. An awesome upgrade is now out! Charging the board will no longer limit you. The smallest and lightest alternator unit the PWC (personal watercraft) industry has ever seen takes the JetSurf board autonomy to a whole new level.

Part of standard equipment.

RATCHET BINDING with BINDING ADJUSTERS

We found the perfect binding setup for long-distance trips. With this setup your feet will be in maximum comfort for long time during the trip.

FCS FINS

Easy fixing without screws. Click - ON / Click - OFF.

Travel kit

Brand new accessory equipment by JETSURF® Motorized Surfboard!

2 STROKE 100 CC ENGINE DF*i*, TITANIUM EXHAUST

The most reliable and powerful engine the motorized surfing industry has even seen combined with the most powerful Titanium exhaust.

FINS ADJUSTER BASE

The base adjuster secures the fins convergence and position setup. This feature significantly increases possibility of customization and the riding characteristics setup for every single Titanium DFI board.

FCS FINS

The Click on/Click off systems offers a wider range of customization for every rider. Availability of various types enables everybody to adjust the FIN according to their particular riding style & riding position.

GRAPHIC DESIGNS

New racing design underline speed & aggression!

JETPUMP TUNNEL WINGLET

The integrated winglet stimulates hydrodynamics flow to increase the performance of the motorized surfboard by sucking more water into the jet pump.

DFI - Digital Fuel Injection

Digital Fuel Injection motor is the first fuel injection solution brought by JETSURF. DFI motor fuel mix preparation goes directly through the injector into the cylinder head.

HULL

Rebuilt hull shape for even faster, sharper and more agile maneuvers on the water. Technology tested by MotoSurf World Champion. Riding experience including G-Force offers unseen characteristics within the motorized surfing industry.

ELECTRIC GEMOTORISEERD SURFBOARD**€ 16322.90**

Het allereerste volledig elektrisch Jetsurf-board combineert de uitstekende manoeuvreerbaarheid van Jetsurf met milieu voordelen, met langste vaar tijd op de markt. Gebruikersniveau: Beginner

Dimensions

Length 1800 mm / 70.87 inches
Width 600 mm / 23.62 inches
Height 150 mm / 5.91 inches
Weight 32,9 kg / 63.9 pounds (battery 18 kg / 39.7 pounds)
Max load 100 kg / 220 pounds
Bindings Dual foot bindings

Drive unit

Propulsion system Jet-Pump direct drive
Racing pump Carbon fiber; Axial flow; single stage
Racing impeller Carbon fiber

Engine

Type Electric
Top speed 50 km/h / 31.06 mph

Battery pack

Battery capacity 3kWh (59 Ah)
Voltage under 60 V
Battery cooling system Partly water cooled

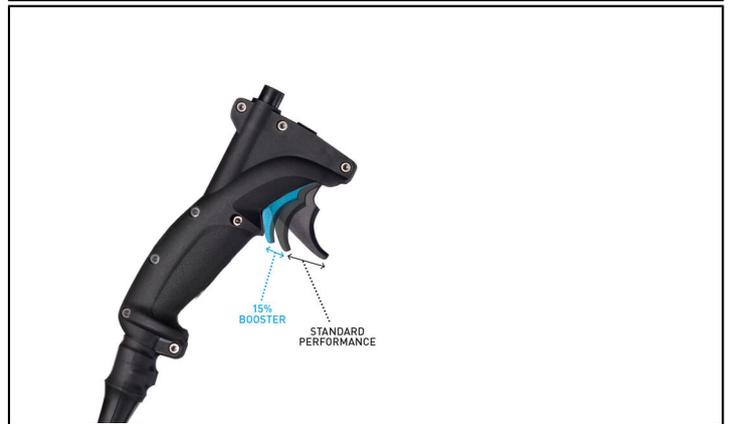

OPTIMAL TURNS

JETSURF boards are available in two different hull shapes. While Sport and Adventure aims on stability in cornering, Race and Race Titanium more curved hulls give enough traction and confidence for faster turning with shorter turning radius.

BOOSTER

JETSURF ELECTRIC model was designed to be environmentally friendly and to keep JETSURF DNA in its riding characteristics. Great weight distribution and fast turning make this fully electric board agile craft to ride. With button on the handle, rider can boost the power and enjoy the speed from turbo effect.

DUAL FOOT BINDINGS

New ergonomic pads and straps will make your ride on JetSurf even more comfortable for your feet. Dual bindings fit for both regular and goofy riders.

POWER UNIT

The most reliable and powerful electrical engine in the electric powered motorized surfing industry. The highest reliability is ensured by a patented air and water cooling system.

- High-torque BLDC engine

VENTILATION SYSTEM

Water decompression and condensation chamber with GORE-TEX technology membrane eliminates humidity inside the motorized surfboard.

COOLING SYSTEM

Sophisticated cooling system ensures all parts of the power unit are cooled down when in operation to keep the board running at an ideal operating temperature.

CHARGING

The most sophisticated and safest charger on the market. With an advanced system that constantly analyzes your battery to keep it under control (progressive warning system included).

HULL

The Electric model doesn't lose anything from the DNA of JETSURF family. To keep perfect maneuverability and speed in the corners, the JETSURF Electric model is available with full carbon fibre JETSURF Race hull shape.

BATTERY PACK

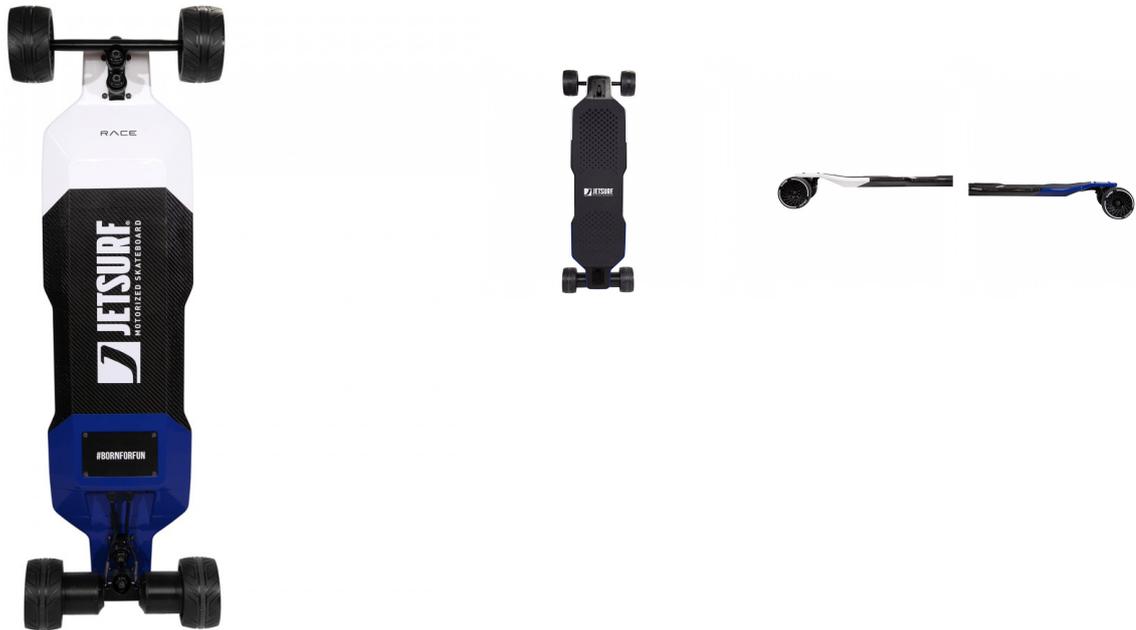

JETSURF Electric model Battery Pack brings battery capacity of 3,1kWh (59 Ah) and charging time of 2,5 hours. This option secures 35 minutes of fun and maximum speed of 50 km/h.

SILENCE

Feel absolutely free riding JETSURF. Electric version of battery powered board is perfectly silent and 100 % emission free. Enjoy your ride wherever you like, ride JETSURF ELECTRIC.

RACE GEMOTORISEERD SKATEBOARD

€ 1990.45

Eerste Jetsurf-serie gemotoriseerde skateboards, ontworpen voor plezier- en race doeleinden. Ontdek een nieuwe manier van plezier op de grond. De elektrische kenmerken: Ervaring Wendbaarheid Race-chassis Acceleratie

Dimensions

Length 100 cm / 39.4 inches
Width 25 cm / 9.8 inches
Height 3 cm / 1.2 inches
Weight 11.5 kg / 25.3 lbs
Max load 120 kg / 265 pounds

Drive unit

Ride modes 3 speed modes + reverse mode
System 12S High Voltage and High Efficiency Electronic System

Premium components

Wheels Airless 120mm
Trucks Dual Kingpin
Deck Premium Carbon fibre

Engine

Type Electric Direct Drive
Top speed 50 km/h / 31.06 mph
Braking Regenerative Brakes
Hill Climbing Up to 30% grade

Battery pack

Battery capacity 650Wh (15 Ah)
Voltage under 50 V
Range 40 km / 25 miles
Charging time 2,5h

Ready to go!

DIRECT DRIVE MOTOR

- High-torque direct drive motor
- Regenerative braking - When you brake you recharge a battery back.
- Water resistance
- Silence

REMOTE

- 3 speed modes - beginner, eco, sport
- Smooth acceleration and braking control
- Integrated display
- Anti slip surface

120mm AIRLESS WHEELS?

- AIRLESS technology used in space industry
- Shock absorbing rubber
- High adhesion pattern
- Aluminium core

DECK

The RACE model doesn't lose anything from the DNA of JETSURF family. RACE deck was designed to give you high stability in high speeds and at the same time keep perfect comfortability and level of safety, the JETSURF RACE model is available with full carbon fibre deck with elegantly integrated battery and electronic.

BATTERY PACK

JETSURF RACE model Battery Pack brings battery capacity of 650Wh (15 Ah) and charging time of 2,5 hours. This option secures up to 40km of fun and maximum speed of 50 km/h.

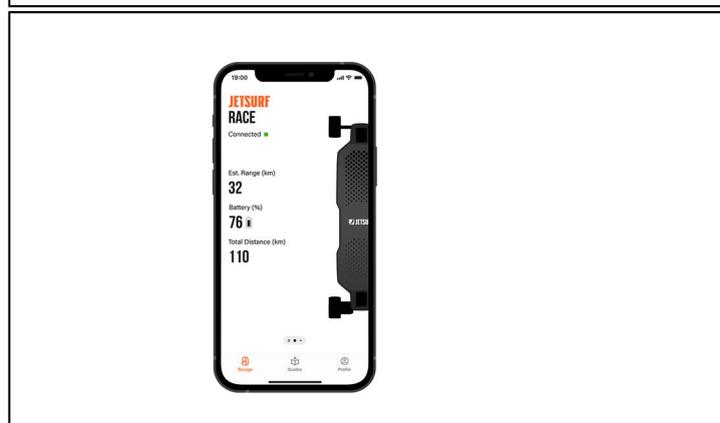

DOUBLE KINGPIN TRUCKS

High stability, high turning radius, great carving experience.

MOBILE APP

- IOS and Android compatible
- Easy connect by Bluetooth
- Board information such as actual battery capacity, estimated range, maximal speed, rides summary and more

SILENCE AND ECOLOGICAL WAY OF TRANSPORTATION / FUN

Explore new way of your transportation and fun on the ground with new models of JETSURF motorized skateboards. Boards are perfectly silent and 100% emission free. Enjoy your ride wherever you like, ride JETSURF.
